

Add the following new claims:

46. (New) An eye patch usable with eyeglass frames that comprises a bridge and a side arm, the eye patch comprising:

a flexible body comprising a first portion positioned on a front of the frames to substantially block frontal vision of an eye and a second portion attached to the first portion to substantially block peripheral vision of the eye;

a first fastener to attach the body to the bridge; and
a second fastener to attach the body to the side arm.

47. (New) The eye patch of claim 46, wherein the first and second portions are substantially opaque.

48. (New) The eye patch of claim 46, wherein the second portion is adapted to at least partially extend along the side arm.

49. (New) The eye patch of claim 46, wherein the first fastener comprises a loop comprising a first end secured to the body and a second end adapted to extend around the bridge to releasably couple the bridge to the body.

50. (New) The eye patch of claim 49, wherein the first fastener further comprises: a releasable connector adapted to releasably couple the side arm to the body.

51. (New) The eye patch of claim 46, wherein the second fastener comprises: a loop adapted to extend around the side arm, the loop having a first end secured to the body and a second end.

52. (New) A method comprising:
providing a flexible body to attach to a front of eyeglass frames to substantially block both frontal and peripheral vision of an eye;
providing a first fastener to attach the body to a bridge of the eyeglass frames; and
providing a second fastener to attach the body to a side arm of the eyeglass frames.

53. (New) The method of claim 52, further comprising:
forming the body to at least partially extend along the side arm of the eyeglass frames.

54. (New) The method of claim 52, further comprising:
selecting a material for the flexible body, wherein the material is substantially opaque.

55. (New) The method of claim 52, further comprising:
extending a loop around the bridge to attach the body to the bridge.

56. (New) The method of claim 52, further comprising:
extending a loop around the side arm to attach the body to the side arm.
